### Description

Phase 1 - The works comprised internal demolitions and alterations to Dan-Y-Coed House and associated asbestos removal, construction of a temporary classroom and the internal refurbishment of Dan-Y-Coed House to provide classroom facilities and associated offices, associated drainage, external works and statutory services connections / adaptations including any adoptions required to provide a fully completed development.

Phase 2 - The works comprised the design & construction of the Residential Block, associated drainage, external works and statutory services connections / adaptations including any adoptions required to provide a fully completed development.

### Testimonial

"During the last couple of years, RPA have become our go-to project managers and cost consultants, and have been involved in the Dan y Coed scheme since its inception. We cannot thank them enough, as we have relied on them to assist us in establishing the project brief, assembling the design and construction team, and managing the process to very stringent time, cost and quality requirements." Mike Currier, Orbis Education & Care
